<b>PROJECT DESCRIPTION:</b>
<p><b>Objectives</b></p> <p>The Avicenna Tajik State Medical University is one of the most influential institutions of high education of the Republic of Tajikistan and according to the requirements of the population of Tajikistan, preparation of highly qualified specialists and improving the health state of the population plays a great role since 1939. In 1952 the institute was named after Avicenna and in 1990 for the achievements in the field of training highly qualified personnel received the International Prize of the "News" agency, Abu Ali Ibn Sino. In 2008 the University was awarded the International Prize of "European Quality". At the present time, the university has a total of 10372 students, including 8930 undergraduate students, 609 clinic residency and internship students, 180 postgraduate students through PhD programme. From this number, there are 1110 foreign undergraduate students from 14 countries - India, Russia, Kazakhstan, Kyrgyzstan, Turkmenistan, Uzbekistan, Latvia, Azerbaijan, Afghanistan, Iran, Yemen, Denmark and the United States. There are 680 professors and teachers</p>

working in ATSMU, including 84 doctors of science and 230 candidates of science. At the university, the educational process is delivered based on 5 specialties- «1-790101 – Health care», «1-790102 – Pediatricians», «1-790103 –Public Health», «1-790107 - Stomatology» and «1-790108 - Pharmacy». Also, the university prepares specialists from foreign citizens proving bachelor's degree based on "Health care". The International relations department of ATSMU works in cooperation with international organizations and foreign embassies trying to develop other international relationships. In 2017, the university has more than 104 international cooperation agreements with foreign scientific, educational institutions.

The main mission for the university is “To provide nationally relevant and internationally recognized medical education for the training of competent specialists and assistance in developing the potential of scientific activities in the field of health care”.

The proposed project is aimed to improve higher education in the field of pharmacy, through the implementation of the Bologna principles of education. The project will facilitate cooperation between the EU and Central Asia through education and training of future specialists in the field of pharmacy. This cooperation will help to enable HEIs to reach the international level in the provision of educational services in the field of pharmacy.

### Activities

**The aim of the project:** Modernization of higher medical education in the field of pharmacy by the implementation of Bologna principles.

**Objectives of the project:**

1. Development of educational programs, taking into account credit–modular system in the specialty "Pharmacy"
2. Modernization of educational-methodical complexes for the specialty "pharmacy" on the Bologna principle of learning
3. Organization of educational trips and the invitation of experts from partner countries, to improve the qualifications of staff
4. The creation of conditions in center of pharmacy (in ATSMU) for the delivery of practical classes with the aim of improving practical skills of students
5. Equipping of the existing center "Pharmacy" with the necessary equipment for carrying out research works and manufacture of medicines
6. The development of scientific potential of faculty, and students in the field of Pharmacy by conducting scientific research

### Results

Expected results:

1. Implementation of credit-modular system at the faculty of pharmacy
2. Developed and modernized educational programs
3. Published upgraded and educational and methodical complex
4. Exchange of experiences during the educational visits, between the teaching staff of TSMU and specialists of partner countries

## Partner Search Form

- 5. Staff qualification and training in modern methods of teaching
- 6. An increased level of competence of students in the field of pharmacy
- 7. The center is equipped with a "Pharmacy" with the necessary equipment

If you are interested in the proposed project, we would be grateful to work jointly with **YOU** on that project. For more information feel free to contact us through mentioned contact info above.
