Associazione E.In.E. - L'Europa incontra l'Europa

Associazione E.In.E. is an hosting organization established in Italy. We examine trends in education and business to forge new projects focused on young people's professional needs to realize their full potential by a training experience abroad.

We are based in the centre of Italy where we have created good partnership relations with companies, schools and universities. Our aim is to build good opportunities for young people's skills development. In this part of Italy there are high profile companies and organisations, leaders in their sectors.

Added value: experience - growth - personality

INTERNSHIP ABROAD

Work experience abroad provide real world experience to those looking to explore or gain the relevant knowledge and skills required to enter into a particular career field. These Training projects in EU Countries are relatively short term in nature but the primary focus is getting people on the job so they have the opportunity to take what's learned and apply it to a real international environment.

Beneficiaries

People who are entering into the labour market, who are unemployed or wish to take advantage of educational or professional formation.

Language Training

Few weeks of a language course is a requirement for the beneficiaries to develop their language ability in an Italian speaking environment. This is facilitated by specialised teachers, who take account of individual language needs in order to prepare each candidate to an adequate status prior to the commencement of the work experience in the hosting company. Beside the daily four hours language class, they are expected to develop their linguistic skills in daily real-life situations. Beneficiaries are immersed in the language and culture of Italy. E.In.E. is situated in the heart of the Umbria, not far from Perugia, Assisi, Rome and Florence.

The Professional Experience

The work experience in Italy is an on-the-job period adapted to the individual's needs and abilities. Each candidate will be placed in a hosting company in line with training objectives of his/her Learning programme, planned between Associazione E.In.E. and the sending organisation. During the language course, each candidate is prepared to face a short meeting with the supervisors at their future work place.

This is an opportunity for E.In.E. tutor, the hosting manager and candidate to meet each other and to define a "training action plan" in order to realize a progressive training programme for each candidate.

The candidates' tasks will be related to their education, vocational training, linguistic, professional background and personality.

Educational cultural events ad visits

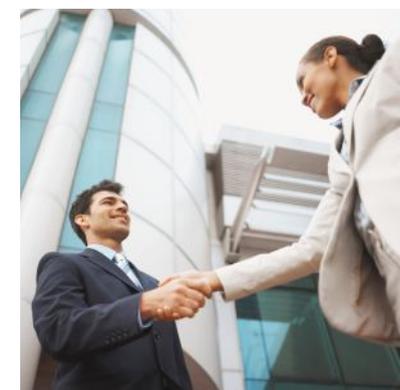

Cultural events and initiatives are an integral part of the beneficiary's experience. They are excellent opportunities to expand on educational opportunities by learning beyond the language class. Focus visits can be tailored for groups of candidates. The tours are pitched at the appropriate level by guides.

Tutoring

For each group of beneficiaries, E.In.E. nominates a tutor who will be the main candidates' supervisor and assessor for the entire duration of the programme. During the work-experience, a nominated hosting company tutor within the company management will monitor and assess the learning programme progress of the trainee.
