Project Description			
<p>University Governance plays a crucial role in developing higher education institutions. It describes how the HEIs define goals, implement plans, assign responsibilities, take decisions, and measure achievements. University Governance is an important factor of success, not only because of its concern of goal definition and impact measurements, but also it includes the approach by which the university leadership can succeed through implementing values such as transparency, participation, accountability and autonomy. This proposed project aims at addressing the weaknesses of governance at the Palestinian Universities. More specifically, we seek to improve and apply good university governance practices at Palestinian universities based on European Universities governance structure.</p> <p>In addition to this, the project aims at achieve the following goals:</p> <ul style="list-style-type: none"> <li>• To improve the Palestinian universities' governance practices.</li> <li>• To enable the Palestinian universities to benefit from the best practices of university governance at the European universities.</li> <li>• To demonstrate a modern, effective, implementable and efficient governance model.</li> </ul>
