10	The UNESCO Biotechnology Center needs fund to build two glass-green houses at Bethlehem University. This kind of greenhouses could serve our experiments on stress physiology of local plants for a long time.	Capacity Building	Bethlehem University	Dr Omar Mousa Darissa UNESCO BERCEN Director odarissa@bethlehem.edu
12	Water & Soil Environmental Research Unit is developing its technical ability in analysis continuously. We are part of reference standard sample program with USGS for testing sample quality control since 1998. The new technology is developing too fast that the part per billion (ppb) levels is still in question. For that purpose an upgrade of the equipment is greatly important to reach the levels of pollution in term of health hazard and also in educating young students at the university. We aim for receiving training and exchange of faculty with other universities and exchanging experiences in teaching and research, these activities are very crucial for faculty developments.	Capacity Building	Bethlehem University	Dr Alfred Francis WSERU Director abedrabo@bethlehem.edu
13	From the Department of Physics looking to initiate collaboration with one of the international universities in two main areas 1) Research in the field of nanotechnology at the service of Renewable energy. This could help us on improving efficiency of organic solar cells by using all the characterization techniques used in nano-science to well characterize layers that form the cell composed mainly from the organic active layer. 2) Research in the field of Quantum chemical computation (simulation or ...)	Capacity Building	Bethlehem University	Dr Haifa Raji Konkar Department of Mathematics Chairperson hkuncar@bethlehem.edu

18	<p>Web 2.0 technology is an essential component of teaching nowadays. The majority of university teachers, however, lack the basic knowledge of the tools offered by Web 2.0. I think that a capacity building project that tries to enhance teachers' knowledge of such tools and training them on how to employ technology in teaching would do them a big service, increase their self-esteem, encourage them to get involved in many university activities that puts the ability to use technology as a pre-requisite for their participation, and make use of such great tools in their advancement in teaching their disciplines. Such tools are free of charge, easy to use, easy to access, and can be adapted based on the need of the teachers and the topic they teach,</p>	CBHE	Palestine Polytechnic University, PPU	<p>Mohammed H. Tamimi, PhD Language Center Coordinator</p> <p>tamimim@ppu.edu</p>
19	<p>The same idea of the project can be developed specifically for foreign language teachers since teaching languages in Palestine, and in other countries, faces hardship and lack the use of great technology tools available for university and schools teachers and decision makers.</p>	CBHE	PPU	<p>Dr. Mohammed H. Tamimi Language Center Coordinator</p> <p>tamimim@ppu.edu</p>
20	<p>Eco-Cultural Heritage Tourism Program (ECHT) The program ECHT poised to provide learners archeological (natural and cultural) and environmental knowledge, skills, and training for developing, leading and managing ecotourism. The trained leaders are equipped to provide strong and vibrant leadership to manage</p>		Al-Quds University	<p>Amer Kanan, PhD akanan@staff.alquds.edu amerkanan@gmail.com +970 599 721143 Environment Dept.</p>

21	<p>Sustainable Energy and Environment Program (SEE)</p> <p>The SEE program shall focuses on leading the transition to a more sustainable energy future. Taking a holistic view of the entire energy system, students learn how different forces interact to shape the current energy landscape and enable or constrain future alternatives. The program aim to train students to become expert problem solvers with the interdisciplinary knowledge and skills needed to lead the transition to a more sustainable energy future. Graduates are expected to implement practical solutions to energy and environmental concerns.</p>	CBHE	Al-Quds University	<p>Amer Kanan, PhD</p> <p>akanan@staff.alquds.edu</p> <p>amerkanan@gmail.com</p> <p>+970 599 721143</p> <p>Environment Dept.</p>
22	<p>Methodological and Pedagogical Problems in the Palestinian School Curricula: From Arabicisation to Adaptation</p> <p>Palestine has been buffeted by several political upheavals which have deleterious effects on its educational system. The establishment of Palestinian National Authority in the 1990s has given education in Palestine a jump start. One-of-a-kind move to safeguard national identity has been made by Palestinian Ministry of Education (MoE). A national team in the MoE prepared from scratch and implemented an independent curriculum for the first time in history. Nevertheless, many methodological problems are observable particularly in translating foreign words (i.e. Arabicisation) throughout the curricula. The proposal aims to look at these problems form pedagogical perspectives</p> <p>Best</p>	CBHE	Al-Quds University	<p>Mohammad Ahmad Thawabteh</p> <p>mthawabteh@staff.alquds.edu</p> <p>Department of English</p>
