Which countries are about to be involved?	Azerbaijan, Bosnia Herzegovina, Finland, Germany, Kazakhstan, Lebanon, Luxemburg, Morocco, Norway, Spain, Sweden, the Netherlands
Language of the project application	English
Duration of the project	24 months

PROJECT DESCRIPTION

Description: The review of the current common problems at higher institutions points us to a common popular problem: "pure theory-oriented" education having almost no link to company context. Setting out from this problem, our overall objective is to enhance the capacity of the project partners with university-industry-society cooperation.

Objectives:
-to compare the professional experiences regarding office work and academic cooperation
-to benefit from the dynamism of multi-cultural professional environment
-to enhance the networking between private organization and higher education institutions via technology transfer offices
-to foster the reciprocal development of human resources
-to involve students in the technology transfer process via Co-op and Mentoring programme
-to promote the reform and modernisation of technology transfer offices at pertinent countries involved
-to propose a good model of university-industry-society cooperation and to encourage its widely being used, especially at universities

Activities:
Phase I: Market needs assessment and capacity building in collaboration with universities and other partners
Phrase II: Designing and rebuilding the structure among the partners via reciprocal visits
Phase III: New structure design of TTO interaction implementation and a report via workshops and a conference
Phase IV: Sustainability and Policy reform in higher education with partners dealing with technology transfer

WE ARE SEARCHING
