

Tere!

Foundation Private Forest Centre (full name in Estonian: Sihtasutus Erametsakeskus), also PFC, is a non-profit organisation under the Estonian Ministry of Environment in Estonia, which main task is to develop private forestry in Estonia. PFC goals are to increase sustainable, environmentally friendly and efficient forest management and its practices in Estonian forests. For this purpose, PFC is training private forest owners and other public and private stakeholders and has built up a network system supporting forest owners on the spot. Also the everyday work of PFC includes developing successful strategies and advising forest stakeholders, whereas the foundation participates in numerous international projects with successful partnerships on different levels.

PFC is interested to participate both in KA1 and KA2 projects. As we don't have yet enough administrative capacity to receive people for trainings, we are interested on the first step to leave our employees to participate on courses under KA1. Under KA2 we are interested in different activities.

KA1 the keywords for potential adult learning are: forestry, bio-energy, wood energy, environment, forest management, sustainable development, bio-energy value chain, but also: fundraising, EU subsidy, EU funding, project management, project cycle, project design.

In KA2 the keywords are the same plus: forest owners association, joint action, local community, co-operative.

Best regards

Indrek Jakobson
