Jean Monnet Module on European energy and climate policy

- **Project period:**
September 2012 - August 2015
- **Funding:**
LLP, Jean Monnet Programme, Key Activity 1,
European Module
- **Partners:**
UT Institute of Government and Politics

Project objective:

- to develop a 3 year long project related to the study modules on energy and the environment;
- to host visiting lecturers from 9 leading European universities and research centers dealing with energy security, European energy and climate policy

Core content

- 2 MA courses "Energy Security Policies in Europe" (6 ECTS) and "European Energy and Climate Policy" (6 ECTS)
- 2 online courses
- An international autumn school "Changing policies and cultures in Europe and Russia: environment, resources, energy" (Autumn 2013)
- MOOC "Energy policies in Europe" (1 ECTS), available to wide public: <https://sisu.ut.ee/energypolicy/>

Jean Monnet Module: added value

- Unique and outstanding educational module
- Previously lack of local expertise
- Multidisciplinary target group (political scientists, economists, physicians, geologists)
- Platform for open discussion (research, summer/autumn schools, events, networking)

Jean Monnet Module: challenges and reality

- Popularity and great interest
- Rapidly changing topic
- Outdated information
- Rather specific topic
- Human factor

Jean Monnet Module: practical advice

- Preliminary agreements with experts/people
- Personal contact
- In-house leading expert
- Constant contact and long-term relations, networking
- Rapidly changing topic, outdated information
→ variety of courses
